REPORT.

COMPTROLLER GENERAL'S OFFICE, }
MILLEDGEVILLE, OCT. 16, 1863. }

To His Excellency, JOSEPH E. BROWN, Governor :

In compliance with the requirements of law, I have the honor to lay before your Excellency a statement of the receipts and disbursements of the Treasury during the fiscal year 1863, commencing on the 21st October, 1862, and ending the 15th October, 1863, showing at the end of the year, a

Cash balance in the Treasury of.....\$2,099,603 44

The appropriations undrawn and likely to be called for amount to \$2,049,602 76 ; leaving a balance in the Treasury of \$50,000 68, to be carried forward to the appropriations for 1864.

Good Assets belonging to the State.

Herewith is furnished a statement of the "Assets belonging to the State," as shown by the books of the Treasury and Comptroller General's offices, viz :

1,833 shares of stock in Bank of State of Georgia	\$183,300
890 shares of stock in Bank of Augusta.....	89,000
186 shares of stock in the Georgia Railroad and Banking Company.....	18,600
7,000 shares of stock in the Atlantic and Gulf Railroad Company.....	700,000
Central Bank Assets, estimated by General Bethune, Agent, at.....	1,500
	<hr/>
	\$992,400

Also, the Western & Atlantic Railroad (*value not to be put upon the same by the Comptroller or Treasurer*). This Road, however, paid into the State Treasury as net earnings in 1859, \$420,000 ; 1860, \$450,000 ; in 1861, \$438,000 ; 1862, \$440,000, and in 1863, \$1,650,000.

Statistics of Taxables, &c., in Georgia 1863.

As also required, accompanying this report, will be found tables A, B, C, and D, containing the taxable property, and other items on the Tax Digests for the year 1863—together with table E, containing the polls in each county for the year immediately preceding this report, the number of voters in each county, at the general election in 1861; the number of children in each county returned for participation in the Educational Fund; the amount drawn by each county, out of the Treasury, from the Educational Fund; the amount drawn by each county for pay of members of the Legislature; the total amount drawn out of the State Treasury by each county, and the total amount paid into the Treasury by each county, for the year 1862.

Table "A" contains the number of acres of land, its total value, and its average value per acre, in each of the counties in the State, for 1862 and 1863. It will be seen that the average value of land per acre in 1863, throughout the State, is \$6 35, against \$4 68, in 1862.

Table "B" contains the number of slaves, their total value, and average value, in each of the counties, for 1862 and 1863. It will be seen that the average value of slaves throughout the State in 1863, is \$913 45, against \$486 53 in 1862.

Table "C" contains the number of polls, professions, free persons of color, children between 6 and 15 by parents and guardians; number of hands employed between 12 and 15, 15 and 55, 55 and 65; value of city or town property; amount of money and solvent debts, and value of merchandise returned on Tax Books for 1863.

Table "D" contains the amount of shipping and tonnage, stocks, manufactures, &c., household and kitchen furniture, value of property not enumerated, total property in 1862 and 1863, and increase of returns of 1863 over 1862.

In consequence of the great difficulty Tax Receivers and collectors had in receiving the returns of the taxable property of the inhabitants of Georgia—one class of tax-payers wishing to value their property at the specie standard, while another class was disposed to value it at its fair market value in Confederate Treasury Notes, it being the currency of the country—and as the taxes would have been very unequal and unjust under our *ad valorem* system, thus to permit tax-payers to return their property as they please, and without any recognized uniform standard, the extra session of the Legislature, in April last, required all persons to return their property at its fair market value in Confederate Treasury Notes on the 1st of April last. The result has been, that a largely increased return has been made this year—and so large that, notwithstanding we raise this year

50 per cent. more tax for the State than was raised last year, yet the per cent. levied upon the \$100, is one and a half cents less than it was last year. The levy being 18½ cents on the \$100 in 1862, while it is but 17 cents on the \$100 in 1863.

It will be seen that the total increased value of the whole property returned this year is \$413,244,421, or about 71 per cent. more than last year. But that it may be seen upon what items of property the greatest increase has been made, I herewith submit a small table of comparison between the returns of 1862 and 1863.

A Table showing the Total Value of various Items of Taxation in the State in 1862 and 1863, and also the increase and decrease in the different items of taxation since 1862.

Property subject to taxation.	Value in 1862	Value in 1863	Increase.	Decrease.
Land, value of,	150,240,623	200,486,676	50,246,053	
Slaves, value of,	230,502,040	414,075,247	213,573,207	
City and Town property,	54,010,410	55,568,277	21,557,867	
Money and solvent debts,	108,432,823	131,727,364	23,294,541	
Merchandise,	6,246,320	54,258,736	48,012,416	
Shipping and Tonnage,	166,300	698,475	532,175	
Stocks, Manufactures, &c.,	4,805,407	19,727,114	14,921,707	
Household & kitchen furniture	2,327,307	4,700,814	2,373,507	
Other property not mentioned,	41,485,532	80,353,886	38,868,354	
	\$578,352,262	\$991,596,583	\$413,244,321	
No. of Polls,	91,562	60,168		31,394
“ Professions,	1,915	1,744		171
“ Dentists,	44	57	13	
“ Daguerrean Artists,	36	25		8
“ Free persons of color,	982	1,159	177	
“ Acres of land,	32,492,764	31,530,203		962,561
“ Slaves,	473,761	486,170	12,409	
“ Children, by parents,		130,718		
“ “ by guardians,		4,720		
“ Hands employed—				
Between 12 and 15,		40,602		
“ 15 and 55,		188,606		
“ 55 and 65,		12,964		

By the above exhibit, it will be seen that the largest increased value in amount, as well as in per cent., has been upon slaves—the increased value being 88 per cent. over the return of 1862. The next largest increased return is upon land, but the increase in per cent. is only 35 per cent. City and town property, it will be perceived, has only been returned at 62 per cent. increase. The item of money and solvent debts is increased 24 per cent.—while “other property not mentioned” has increased 92 per cent; “stocks, manufactures, &c.,” 300 per cent., and “merchandise” 790 per cent. The large increase in the return of merchandise is readily accounted for. Much of it is in cotton, that has not heretofore been returned for taxation. The items of “stocks, manufactures, &c.,” and “other property not mentioned” are also indebted to the return of cotton for a part of their increase, as some Tax Receivers have erroneously placed cotton in these columns, instead of placing it in the

column of merchandise, where it has always properly belonged.

It will also be seen that there is a large decrease in the number of polls returned for taxation. This is produced by the passage of an act by the extra session in April, exempting from taxation all persons whose property was not worth more than \$1,000 then in the army of the State or Confederate States Governments; and I presume the decrease in professions is on account of an act passed in 1862, exempting all professional men, serving as privates in the army, from a professional tax. The number of children returned this year for participation in the Educational Fund is 135,445, against 141,728 in 1862. Why this diminution, I cannot imagine.

The Legislature in 1862, while passing an act restricting the planting of cotton to three acres to the hand, incorporated in said act, a section requiring all owners of slaves, or employees, to give in to the Tax Receiver the number of hands employed by them during the year. This section in the act does not say that those planting cotton or corn, or that agriculturalists alone should make this return, but it said "*all* owners of slaves, or employees, shall give in to the Tax Receiver, the number of hands owned or employed by them between the ages of 12 and 15, 15 and 55, and 55 and 65, each year during said war."

Under this section, Tax Receivers and Collectors have received returns in various ways. Some have received the returns of "all persons," and have included in their return house servants, mechanics, and slaves, or the employed white and black in every thing, while others again have only returned the number of hands employed in agricultural pursuits. The total return of these hands employed, it will be seen, is 242,172. But this return is defective, for any practical purpose. It neither gives any thing like an approximation to the number of hands employed in agricultural pursuits, nor does it give the total number of hands between the ages stated employed in all other pursuits in the State. I would therefore suggest that this section of the act of 1862 be either repealed, or that it be amended so as to be properly understood. As it stands, it only puts additional labor upon the Tax Receiver and Collector, and encumbers the Tax Books. It may, however, have prevented some unworthy citizen from planting more cotton than the law authorized him to plant—and if the restriction upon the planting of cotton be continued next year, I think it would be well enough to let this requirement remain in force—but amend it so that only those hands engaged in or connected with tilling the soil shall be returned.

An Abstract from the books of this office, as required by law, setting forth the amounts of the several appropriations,

both common and special, under their respective heads, the dates and amounts of warrants, in whose favor drawn, and the balance undrawn of each appropriation. As also as required, a table will be found, showing the amount of taxes that the inhabitants of each county in the State stand charged in the Digests returned to this office by the several Tax Receivers and Collectors for the year 1863; from which it appears that the tax assessed in accordance with the acts of the 13th and 15th Dec., 1862, amounts to \$1,692,092 42.

Receipts and Disbursements at the Treasury for the Fiscal Year 1863.

Of the receipts into the Treasury for the fiscal year 1863, there was received :

From General Tax, 1862,.....	\$ 945,294 70
“ Net earnings Western & Atlantic Railroad.....	1,650,000 00
“ General Tax 1863.....	109,185 30
“ “ “ 1861.....	452 29
“ “ “ 1860.....	166 38
“ “ “ 1857.....	5 00
“ Tax on Banks 1862 and 1863.....	65,331 83
“ Tax on Railroads.....	12,182 54
“ Tax on Foreign Insurance Companies,	3,189 36
“ Tax on Bank Agencies.....	301 39
“ Tax on Express Companies.....	686 25
“ Bank Dividends.....	32,012 00
“ Dividend on Railroad Stock.....	13,308 00
“ Military money refunded by Dr. B. A. White.....	906 00
“ Savannah Gunboat Fund.....	20,000 00
“ Sale of Ordnance Stores.....	4,374 75
“ Net earnings of Card Factory.....	15,304 11
“ Sale of island lots near Columbus....	713 41
“ Money refunded by city of Columbus,	225 00
“ Dividend of Insurance Company....	37 50
“ Fees on Testimonials.....	2 50
“ Fees from Secretary of State's Office,	262 50
“ Income Tax.....	125,241 64
“ Refunded by Penitentiary on advance for making salt sacks,.....	17,600 00
“ Issue of Georgia Treasury Notes....	5,268,000 00
“ Issue of State Change Bills.....	473,660 00
	<hr/>
	\$8,758,442 45
Add to this the cash in the Treasury, Oct. 20, 1862.....	693,002 42
	<hr/>
And we have a total fund of.....	\$9,451,444 87

8 PART I—COMPTROLLER GENERAL'S REPORT.

Of the disbursements during the same time, there has been paid :

On Civil Establishment of 1862.....	\$ 18,218 49
“ “ “ 1863.....	39,488 48
“ Contingent Fund 1862.....	12,896 40

On account salary Superintendent Ga. Mili- tary Institute.....	3,000 00
Commissioners to Florida about boundary line,	1,000 00
To pay for guns.....	2,500 00
T. Butler King, as Commissioner to Europe,	2,900 00

PART I—COMPTROLLER GENERAL'S REPORT. 9

To. J. M. Mobley, as Secretary of Senate...	5,527 75
To L. Carrington, Clerk. House of Reps...	6,398 00
For stills seized.....	578 60
For other miscellaneous appropriations, which will be seen in an Abstract ac- companying this Report, amounting to	8,075 01

Total,..... \$7,351,841 43

Leaving a balance in the Treasury of \$2,099,603 44.

Having thus exhibited the operations of the Treasury for the past twelve months, I have deemed it not inappropriate to allude to, and make an approximation to the ordinary receipts and expenditures of the ensuing fiscal year. The anticipated receipts into the Treasury for the fiscal year 1864, may be stated as follows:

From General Tax 1863.....	\$1,480,000 00
“ Net earnings W. & A. Railroad.....	600,000 00
“ Tax on Banks.....	35,000 00
“ Tax on Railroads.....	12,000 00
“ Bank dividends.....	27,000 00
“ Miscellaneous.....	20,000 00
“ Income Tax,.....	374,758 36

\$2,548,758 36

Add balance after paying appropriations for 1863	50,000 68
---	-----------

And we have a total of..... \$2,598,759 04

It will be seen that the net earnings of the Western & Atlantic Railroad for the fiscal year 1864 is put down at only \$600,000, while it paid \$1,650,000 for the last year. Part of this \$1,650,000 was made the year previous, and was due by the Confederate States Government, but not collected until this year. In addition to this, the Road has done an extraordinary amount of Government business this year—it may not have the same next year—and hence it is but safe to put the net income next year at \$600,000. Were it not for the Government freight, &c., it might with propriety be put at \$500,000.

The demand upon the Treasury for the same year, will approximate as follows:

To pay members of the Legislature.....	\$ 70,000 00
“ Civil Establishment.....	72,100 00
“ Contingent Fund.....	16,000 00
“ Printing Fund.....	30,000 00
“ Reduction of Public Debt, past due....	176,000 00
“ “ “ “ coming due..	41,500 00
“ Interest not called for.....	400,000 00
“ Interest coming due.....	389,595 00

10 PART I—COMPTROLLER GENERAL'S REPORT.

To Support of pauper patients, Lunatic Asylum	50,000 00
" Salary of Sup't Lunatic Asylum.....	2,500 00
" Officers and servants Lunatic Asylum..	12,000 00
" Academy for the Blind—Support of....	8,000 00
" Ga. Military Inst., for support of Cadets,	2,000 00
" Ga. Military Institute, salary of Sup't..	2,000 00
" Military storekeeper at Milledgeville..	600 00
" Educational Fund	155,247 00
" Subscription to Atlantic & Gulf Railroad,	100,000 00
" Indigent Soldiers' Families, (Income Tax, already appropriated, in addition to the \$2,500,000, and to be distributed after the 15th Dec. next.) estimated at.....	500,000 00
Miscellaneous.....	50,000 00

Total.....\$2,077,542 00

Showing a surplus at the end of the year of 521,217 04

But if the war continues for the next year, the State will have to provide for the support of the families of those soldiers in the army, who have no property and who have left no support at home for their families. A fund for the Hospital Relief Association, and a Military fund may also have to be provided. Without intimating or expressing an opinion as to the sufficiency or insufficiency of the \$2,500,000 appropriation of last year for the support of the families of indigent soldiers, I will assume that it be the same next year, and the matter will then stand thus:

For the support of indigent soldiers' families..	\$2,500,000
Hospital and Relief Association.....	400,000
Military Fund	1,000,000

\$3,900,000

Thus it will be seen that in all probability we may have to expend over \$3,000,000 more than the above stated receipts, which will have to be raised either by taxation, by a further issue of Treasury Notes and Change Bills, or by a loan.

If much or most of this be raised by taxation, it must be understood, that unless the present tax laws are changed, the taxes for 1864 will not come into the Treasury until November or December, 1864. I hope, then, I may be excused for remarking further, that, instead of issuing State Treasury Notes, as heretofore issued, viz: payable in *specie* or *six per cent. bonds, six months after a treaty of peace*, it might be better to anticipate the tax by issuing Treasury Notes or Change Bills *payable in currency or Confederate Treasury Notes*. In addition to the remainder of the Change Bills

now authorized to be issued, most of which will be in 50 and 25 cent bills, a further issue of \$2,000,000 or \$2,500,000 might be authorized, to be issued principally in the denominations of 1, 2, 3, and 4 dollar bills, payable in currency or Confederate Treasury Notes, whenever the sum of twenty dollars and upwards is presented at the State Treasury. These notes would no doubt circulate freely as a currency, and many of them might not be returned to the Treasury for redemption before the collection of the taxes, or before the end of the war. But, in case they should be presented in large sums and the State should need the currency to redeem them, it might be provided that the Governor raise the sum by placing Georgia six per cent. Bonds in the market, or issuing Treasury Certificates of Deposit, in sums of not less than \$500, and any larger sums that depositors might desire, payable like the Treasury Notes heretofore issued, viz: in specie or six per cent. bonds, six months after a treaty of peace.

But it may be asked, why not continue the issue of Treasury Notes, as heretofore? The first reply is, that they will not circulate as a currency. Treasury Notes payable in specie or eight per cent. bonds, six months after a treaty of peace were first tried, and they did not circulate because capitalists and others bought them up and laid them away as an investment. Treasury Notes payable in a similar manner, calling for specie or only six per cent. Bonds, have also been tried, and they too, will not circulate, because Capitalists and others pay a handsome premium for the same, and lay them away, to be kept until six months after the war. In both these instances the State paid these notes out as currency, and at par, and got no premium, while the premium went to the various parties receiving and disposing of these notes. Then, as capitalists and others are so anxious to get Georgia promises to pay after the war, they are willing to pay a handsome premium for the same—as one, or half dozen papers, or bills, can be more easily and conveniently kept and transferred from place to place than 100, 500, 1,000 or 10,000 papers or bills, and as the larger ones would be greatly preferred, and would command a higher premium—and to *enable the State to get the premium on her high credit, and at the same time avoid the appearance of claiming or attempting to claim a premium upon her "currency" over that of the Confederate States Government "currency,"* I favor the issue of Treasury Certificates of Deposit, or State Bonds, to obtain such currency as the State may hereafter need to redeem her change bills, instead of issuing Treasury Notes like those heretofore issued, and paying them out as currency.

Again. If Treasury Notes or Change Bills payable in currency or Confederate Treasury Notes be issued by the State, and

they answer the purposes of meeting its appropriations and circulating freely, they can be called in and redeemed *at any time* when there may be a surplus of currency in the Treasury. Whereas, Treasury Notes or Certificates of Deposit can only be redeemed in *specie or eight and six per cent. bonds*. As every thing is selling at such high prices, and our expenditures are so heavy, and money so abundant, taxation will necessarily be comparatively high during the war—and as when the war ends, and our heavy expenditures cease, there will in all probability be a large surplus of currency in the Treasury, I think it well enough for the State, if possible, to so manage her finances as to be able to immediately place all this surplus currency to the extinguishment of so much of her "Public Debt."

THE PUBLIC DEBT—IN BONDS AND TREASURY NOTES.

Through the courtesy of John Jones, Esq., State Treasurer, I am enabled to furnish the following statement of the present indebtedness of the State, in Bonds, viz :

Due in 1862, 7 per cent. Central Bank Bonds	\$ 22,500
" 1863, 7 " " " "	53,500
" 1864, 7 " " " "	41,500
" 1862, 7 " for W. & A. R. R...	25,500
" 1862, 6 "	18,000
" 1863, 6 " now redeemable...	40,500
" 1865, 6 "	18,000
" 1868, 6 "	176,500
" 1869, 6 "	262,500
" 1869, 5 "	72,000
" 1870, 6 "	134,500
" 1871, 6 "	153,750
" 1872, 6 "	623,500
" 1872, 7 " now redeemable...	100,000
" 1873, 6 "	169,500
" 1874, 6 "	75,000
" 1874, 7 "	176,500
" 1878, 6 "	100,000
" 1879, 6 "	200,000
" 1880, 6 "	200,000
" 1881, 6 "	100,000
" 1881, 6 "	25,000
" 1881, 7 "	842,500
" 1872, 7 " War Tax.....	2,441,000
	<hr/>
	6,071,750
And due in 1859, probably paid.....	6,000
" " 1861, " "	10,000
	<hr/>
	6,087,750

It will be seen that \$6,000 Central Bank Bonds due in 1859, and \$10,000 of similar Bonds, due in 1861, have not been presented for payment—at all events, they are not marked paid in the Bond Book. But, as the State has, for several years past, at different times, redeemed Bonds not due, it is possible these Bonds may have been paid, and the fact of payment omitted to be entered on the Bond Book. But, if paid, they are sealed up in packages, in the Treasury office, which neither the Treasurer or Comptroller General can open without authority from the Legislature.

It will thus be seen that the State is now indebted in Bonds to the amount of \$6,087,750—\$176,000 of which being past due, are not paying any interest. The remaining Bonds now out are paying an annual interest of \$389,595, viz: \$3,561,000 7 per cent Bonds, \$249,270.00; \$2,278,750 6 per cent Bonds, \$136,725.00; and \$72,000 5 per cent Bonds, \$3,600.00; which amount of interest will be reduced each year as the Bonds become due or are redeemed.

The amount now due and coming due, during the fiscal year 1864 is \$217,500, but whether all will be presented within that time is questionable, as some of them are no doubt in the Northern States, and in Canada, and may not be presented until after the close of the war.

In addition to this debt of the State in Bonds, she also owes for \$7,588,000 Treasury notes lately issued that bear no interest. Neither are they fundable or redeemable until six months after a treaty of peace. It is true a portion of them are redeemable "six months after a treaty of peace, or when the Banks of Savannah and Augusta resume specie payments, if before that time," yet as it is not at all probable that the Banks of Savannah and Augusta will resume specie payments before that time, it may be said that none of the Georgia Treasury notes are fundable or redeemable until six months after a treaty of peace. The State also owes, in Confederate Treasury notes, for \$473,660 State Change Bills, lately issued. The Public Debt of Georgia, therefore, at this time, is as follows:

Bonds, bearing interest.....	\$5,911,750
Bonds, not bearing interest.....	176,000
Treasury Notes, not bearing interest.....	7,588,000
State Change Bills not bearing interest.....	473,660
Total.....	\$14,149,410

To pay this interest and meet this debt, as it becomes due, Georgia has not only her taxable wealth, returned this year at \$991,596,583, but she has also the following public property, which if sold at any time, after the resumption of specie payments, would pay more than two thirds of this

14 PART I—COMPTROLLER GENERAL'S REPORT.

debt, leaving but a very small debt to be paid by taxation. Her public property is as follows :

7,000 shares of stock in Atlantic & Gulf R. R.	\$700,000 00
2,909 shares of stock in several Banks.....	290,900 00

Also, her Western & Atlantic Rail Road, which has been paying into the State Treasury since 1859 between 6 and 7 per cent upon \$7,000,000, and paid into the Treasury during the past year \$1,650,000, and which, before the rise of all kinds of property, was valued by a committee of the Legislature at.....	7,849,224 68
---	--------------

\$8,840,124 68

As over \$6,000,000 of this debt has been created by the State during the war, for her military defense, and for assisting in clothing the soldiers of the Confederacy from Georgia, the amount thus necessarily spent will no doubt at some future day be assumed, and be refunded by the Confederate States Government. But whether this be done or not, if the State is not forced to increase her debt further for war purposes, even with our present tax of *not quite one-fifth of one per cent.*, (which is not high, compared with the taxes of other States in peace times,) and with the annual net income from our Railroads, we can go on and defray the ordinary expenses of our State Government, and be liberal towards Education, our Lunatic, Blind, and other institutions, and pay our debt promptly; and could thus pay the whole of it in about half the time some of it is due, if persons holding our Bonds would receive par for them before coming due; without selling any of our public property.

THE EDUCATIONAL FUND, 1863.

By an Act, approved January 22, 1852, the dividends arising from the stock belonging to the State in the Bank of the State of Georgia, the Bank of Augusta, and the Georgia Rail Road and Banking Company, were "set apart as a permanent fund for the education of the *poor*." This fund was distributed as a "Poor School Fund" up to 1858. By an act of the 11th Dec. 1858, the manner of the future distribution of this fund was changed. This Act annually appropriated \$100,000 of the net earnings of the Western & Atlantic Rail Road "TO THE PURPOSES OF EDUCATION"—the Bank Dividends before used as a Poor School Fund was added to the same, and these two sums were directed to be "divided out among the several counties, according to the return of *all white children* thereof between the ages of 8 and 18." (This Act was amended in 1859, requiring the same

to be divided among children between 6 and 18.) The Act of 1858 also provides, that in addition to the sums above specified, whenever the Governor redeemed any portion of the Bonds of the State then outstanding, he is to issue, in lieu of the same, other Bonds to be deposited with the Secretary of State as the Trustee for the Educational Fund of Georgia, and the interest on the same at 6 per cent. per annum, is to be annually added to this Fund, and be distributed. The issue of these Bonds to go on from year to year, in proportion to the amount of the Public Debt redeemed, until the whole debt (existing in 1858 to \$2,627,000) is paid off. At which time, in addition to the \$100,000 from the Road, and the Bank Dividends, the whole interest of this \$2,627,000, amounting to \$157,620 00 annually is to be added to the fund. In addition to these sums, the Governor is authorized annually to add any surplus that may be in the Treasury at the time the apportionment is made.

Up to October, 1862, however, only \$387,250.00 of the Public Debt in Bonds had been redeemed since the passage of the Act of 1858, and therefore, the condition of this Fund for this year stands as follows :

From Bank Dividends.....	\$ 32,012 00
From interest on \$387,750 Public Debt re- deemed.....	23,235 00
From Western & Atlantic Railroad.....	100,000 00
	<hr/>
	\$155,247 00

SALARIES AND PAY OF OFFICERS OF THE STATE.

As the 97th section of the Code requires the Comptroller General in his Annual Reports, to give "the salaries and pay of all officers of the State," I respectfully submit the following statement of the same :

Executive Department.

	Salary per annum.
Governor,	\$4,000 00
2 Secretaries of Ex. Dept. each,	1,350 00
Recording Clerk do	1,350 00
Messenger Executive Department,	500 00

Secretary of State.

Salary,	1600 and fees.*
---------	-----------------

*NOTE.—After consolidating the offices of Secretary of State and Surveyor General, and affixing \$1600 as the salary for the Secretary of State, the Legislature in 1861 adopted the following "Joint Resolution," viz :

"Whereas, by an Act passed at the present session of the General Assembly, the offices of Surveyor General and Secretary of State have been consolidated, and whereas many of the maps and charts in the Surveyor General's office are very much mutilated and worn out :

Be it resolved, by the Senate and House of Representatives, That the Secretary of State, for the time being, and his successors in office, be, and he is hereby re-

16 PART I—COMPTROLLER GENERAL'S REPORT.

Comptroller General.

Salary,	2,000 00
1 Clerk,	1,000 00

State Treasurer.

Salary,	2,000 00
1 Clerk (temporary) to assist the Treasurer, in his duties, at \$100 per month.	

There are also employed under the superintendence of the Treasurer and Comptroller General, eight Clerks, for the purpose of preparing State Change Bills and Treasury Notes for issue—numbering, stamping, trimming, registering and signing the same for the Treasurer and Comptroller General.

In the Executive office there is at present "one Aid-de-Camp to the Commander-in-Chief, at a compensation of \$7 per day *when actually employed*. His duties are to attend to the military correspondence, execute military orders, and to perform such other military service as Aid, pertaining to the Head Quarters of the Commander-in-Chief, as do not belong to the Adjutant and Inspector General's office."

State Librarian.

Salary of	500 00
-----------	--------

Captain and Guard at State House.

Pay of	1200 00
--------	---------

Military Storekeeper at Milledgeville.

Salary of	600 00
-----------	--------

Compiler of Laws.

Salary of	500 00
-----------	--------

Judiciary.

Judges of the Supreme Court, each,	3,500 00
Reporter of the Supreme Court,	1,000 00
Judges of the Superior Courts, each,	2,500 00
Solicitors General, each,	225 and fees.
Attorney General,	225 and fees.

quired to make new all maps and charts that are now worn out or mutilated, and see that the Records in said office are preserved and neatly kept; and as a compensation for his services, the Secretary of State, for the time being, and his successors in office, shall receive all the fees arising in the Surveyor General's office, of whatever kind.

Assented to, Dec. 14, 1861.

It is true the Code that went into operation last January, provides that these fees shall be paid into the Treasury—but in Dec. 1862, the Legislature passed another Act providing that "wherever the provisions of the Code conflict with the Acts passed by the General Assembly in the years 1861 and 1862, the latter shall be the law of this State, any law to the contrary notwithstanding." The question arises, however, is this "joint Resolution" of the Legislature in 1861 an "Act, passed," or with in the meaning of the Act of 1862? Or can a joint Resolution of 1862, conflicting with the Code, set it aside, under the above stated Act. If yea, then the Secretary of State can continue to receive these fees as heretofore. If not, further legislation may be necessary before he can appropriate to his own use, any fees received by him since the 1st of January 1863. Under these circumstances, however, the Secretary of State has paid into the Treasury the fees received by him since the first of January last—subject to the future action of the Legislature.

The Legislature.

The President of the Senate and Speaker of the House of Representatives, receive \$10, and the other members \$6 for each days attendance, and all are allowed \$5 for every twenty miles of travel going to and returning from the seat of Government, the distance to be computed by the direct mail route, if any, and if none, by the direct land route usually traveled.

The Secretary of the Senate receives \$87.50 per day during the session, as full compensation, and he is to "employ and pay out of said sum the Engrossing, Enrolling, and all other Clerks and Assistant Clerks necessary to discharge promptly and properly all the duties of Secretary and Clerk in the Senate."

The Clerk of the House of Representatives receives \$100 per day, during the session, as full compensation, out of which he is to employ all the necessary Clerks required, as stated relative to the Secretary of the Senate.

By the 178th section of the Code, it is provided that each House is entitled to a Door keeper and Messenger, "who shall receive the same pay as the members of the General Assembly."

Lunatic Asylum.

Trustees, each,	\$ 75 00
Superintendent and resident Physician,	2,500 00
Assistant Physician,	1,200 00
Apothecary,	500 00
Treasurer,	200 00

THE FIVE MILLION MILITARY APPROPRIATION.

Although the Comptroller General is not at all responsible for the expenditure of this fund in any way, it being alone subject to the warrants of your Excellency, yet as this report will show that the Quartermaster General had a warrant entered and charged for \$2,000,000 at one time, it might naturally be asked why and for what purpose this amount was drawn at one time? That this report may give as full and ample information as possible in relation to the expenditures of the State, I have thought it not inappropriate, with your permission, to state the circumstances under which this warrant was drawn.

Under an Act of the 28th Dec. 1843, and by the 89th section of the Code, it is provided that where any money is appropriated in a general way for any object or purpose, if the amount is not drawn out of the Treasury by warrant six months after the expiration of the political year, the same shall revert to the general fund in the Treasury, and shall not be drawn out except upon a new appropriation. Under this Act and the 89th section of the Code, all the balance of the \$5,000,000 appropriation not drawn out by warrant before the first day of May last, reverted to the general fund in the Treasury. To preserve \$2,000,000 of this fund for future use, on the 24th April last, your Excellency drew your warrant on the Treasury for the amount, which was passed as the law directs.

As before remarked, although the law gave the Comptroller General no control over the fund, or the right to enquire into the manner of its expenditure by the Quartermaster General, yet after passing the warrant, I enquired of that officer the use to be made of this \$2,000,000. Whereupon he courteously exhibited to me your order, directing him to deposit the amount in the State Treasury and only to draw it out from time to time, as he needed it, to make purchases of cotton and woolen goods, leather, &c., for the purpose of making clothing, shoes, hats, &c., for the Georgia soldiers in the Confederate army, this winter, where the Confederate government failed to supply them. The Quartermaster

General further stated that your Excellency was fearful the Confederate government would find much difficulty in obtaining sufficient clothing for the whole army, that cotton and woolen goods and leather were advancing in prices, and would be much higher by fall (which has proven to be the case) and that he was directed by you to make purchases as soon as possible before a further advance, &c. As I am about to close this report, I have enquired of the Treasurer in relation to the deposit, and I learn that the Quartermaster General has drawn out \$1,823,500 of this \$2,000,000 for the purposes above stated.

\$2,500,000 APPROPRIATION FOR THE SUPPORT OF INDIGENT SOLDIERS' FAMILIES.

Accompanying this Report will be found a table showing the number and classes in each county, of the beneficiaries receiving this fund, and also the amount appropriated to each county.

The act required the returns of the Justices of the Inferior Courts to be made by the first day of February, and the Comptroller General was directed at that time to proceed to the consolidation of the returns of the several counties, and when finished, in connection with your Excellency, to make the apportionment. But, on the first day of February, not more than half of the counties had made their returns, and it was not until the 3d of March that sufficiently full returns had been received to enable a full and fair apportionment to be made. In the meantime your Excellency, when called upon, advanced to the several counties such sums as you were authorized by the act of 1862 to advance.

At the time the apportionment was made, there were 84,119 beneficiaries returned, and the fund was apportioned to each county, in accordance with the same. But, upon a subsequent investigation, it having been found that Screven returned 25 too many, and that Gwinnett's return was 500 more than it ought to be, there is now \$15,602 of the fund not apportioned. Having once made this apportionment in the manner prescribed by law, I do not feel authorized to say where this balance shall be placed, (if paid out at all) without the direction of the Legislature. Three installments of this fund have been paid out to the several counties as called for. By order of your Excellency, the first and second installments were paid out on and after the 3d of March, and the 3d installment was ordered to be paid out on and after the 8th of July last—one half being paid in State Treasury notes and the other half in Confederate Treasury notes and

State Change bills. There has been paid out on this appropriation \$1,690,430 25 leaving \$809,569 75 still undrawn.

The following are the classes and number of persons, who have been beneficiaries of this fund :

1. Widows of soldiers who have died in service,	4,022
2. No. of disabled soldiers by sickness or wounds,	553
3. No. of wives, mothers, &c., dependent upon soldiers in service, not able to support themselves,	22,855
4. No. of orphans of deceased soldiers under 12 years of age,	8,556
5. No. of children of women, not widows, dependent upon soldiers in service,	46,219
6. No. of children over 12 years of age, not able to support themselves and dependent upon indigent soldiers in service,	532
7. No. of all children and other indigent persons unable to support themselves, but dependent upon soldiers,	841
Total	83,628

THE ISSUE OF GEORGIA TREASURY NOTES.

The last Legislature having directed that non-interest bearing State Treasury Notes, payable in specie or eight or six per cent. Bonds six months after a treaty of peace, be issued from time to time to supply the wants of the Treasury, this has been accordingly done, and as will be seen from the account current in this report, \$5,268,000 has been realized from this source—\$1,268,000 of the notes issued being what is called 8 per cents, and are all that were ordered by the last Legislature to be issued of that class, and \$4,000,000 being what is called 6 per cents. There having been \$2,320,000 of the 8 per cents issued during the fiscal year 1862, the total issue of Georgia Treasury Notes up to date is as follows :

8's	\$3,588,000
6's	4,000,000
Total	\$7,568,000

The \$100's, the \$50's and \$150,000 of the \$10 bills of the first issue are signed by "John Jones, Treasurer," and "P. Thweatt, Comp. General." The \$100's and \$50's of the second issue are signed by "John Jones, Treasurer," and "T. J. Bloodworth, for Comp. General." The 20's of the first issue are also signed by "John Jones, Treasurer," and

"T. J. Bloodworth, for Comptroller General." Also, the first \$150,000 of \$5's are signed by "John Jones, Treasurer," and "T. J. Bloodworth, for Comptroller General." The remainder of the Treasury Notes are signed by "S. J. Howard, for Treasurer," and "T. J. Bloodworth, for Comptroller General."

THE ISSUE OF STATE CHANGE BILLS.

The last Legislature directed the Treasurer and Comptroller General, under the supervision of the Governor, to proceed to the issue of \$1,000,000 of State Change Bills, redeemable in Confederate Treasury Notes, when presented in sums of five dollars and upwards.

In pursuance of this Act of the Legislature, in the early part of the year, your Excellency contracted with Mr. R. H. Howell, Engraver, to engrave and print these Change Bills, together with the Treasury Notes, at the Capitol in Milledgeville—but in consequence of the difficulty in getting suitable paper on which to engrave and print these Change Bills we were not able to issue any of them until the month of April. Since commencing on them we have had eight Clerks regularly employed in numbering, trimming, stamping, re-registering and signing such Change Bills and Treasury Notes for the Treasurer and Comptroller General. The preparing and issuing these notes is no easy job, as all who have any experience or thought about the matter will readily testify. As it was thought that the expense and trouble in issuing the smaller bills, would offer no inducement to any one to attempt to counterfeit or circulate the five, ten, fifteen and twenty cent bills, and as the Act of the Legislature authorized your Excellency to have the signatures on such bills as you thought proper, engraved on the same, the 5, 10, 15 and 20 cent bills were thus engraved and were numbered and trimmed separately. But all the Treasury Notes and other Change Bills from twenty-five cents up, were numbered, stamped, trimmed, registered and signed for the Treasurer and Comptroller General by the regular Clerks. In addition to the Treasury Notes issued, the following are the denominations and amounts of State Change Bills issued up to date :

5 Cent Bills	403,200 Bills	\$ 20,160
10 do	464,400 "	46,440
15 do	66,600 "	9,990
20 do	12,600 "	2,520
25 do	299,000 "	74,750
50 do	245,000 "	122,500
75 do	10,000 "	7,500
1 Dollar Bills	50,000 "	50,000
2 do	50,000 "	100,000

BANK REPORTS IN 1863.

Believing that a condensed statement of all the Bank Reports for 1863, will be useful to the Legislature, accompanying this Report will be found a table containing the reports in full, (in a condensed form) of all the Banks of this State, made in response to the call of your Excellency in June last. The following is an abstract from said table and also an abstract of a similar table compiled in 1862 :

LIABILITIES OF THE BANKS.

	1862.	1863.
Capital Stock,	\$17,262,072	\$17,335,832
Notes of Banks in circulation,	15,339,241	15,572,542
Deposits,	11,588,378	25,101,848

Due from other Banks,	2,219,341	5,847,363
B'ds & stocks of States & Corp'tions	5,650,566	8,104,026
Miscellaneous,	10,003,672	11,527,179
Real Estate, &c.,	814,592	764,014
Specie, bona fide the prop'ty of B'ks	1,643,463	1,498,118
	<hr/>	<hr/>
Total,	\$51,438,264	\$70,713,048

In the above statement of liabilities the Central Railroad and Georgia Railroad and Banking Companies have returned as their capital stock, their Railroads and appurtenances, as said Roads are responsible for their Banking operations—although the first only uses as a banking capital \$300,000, and the latter \$500,000. Therefore, in giving them credit for their Assets, I have classed their Railroads, &c., as "Miscellaneous." "Advances on Cotton," "special loans," &c., of other Banks, have also been classed "Miscellaneous." Fractions in cents have in all cases been dropped, as immaterial, the object of this statement being merely to give the general condition of the Banks when their last reports were made.

THE POPULATION—VALUE OF FARMS AND LAND AND THE AGRICULTURAL PRODUCTIONS OF GEORGIA IN 1850 AND 1860, COMPILED FROM THE CENSUS RETURNS OF 1850 AND 1860.

As the existing war has made it necessary for the Legislature to provide in some way for the support of a large portion of our population—the soldiers' widows, wives, children and dependents, who are unable to support themselves—I have deemed it peculiarly appropriate at this time, to offer statistics showing the approximate condition of the different counties in the State, and to gather all the information that can possibly be obtained, bearing upon this subject. I am sorry that the continuous daily occupation in the ordinary duties of my office has circumscribed me much in my efforts to obtain this information. The last Legislature, however, having allowed this office \$1,000 (a sum much too small, in these times, for the pay of a competent person) to employ a clerk to assist in the discharge of its duties, I have been enabled to do much more of this labor than could otherwise have been done. Indeed, but for this assistance obtained, I could not have furnished any of these statistics; for the reason that the ordinary daily duties of this office, for the past year, have been so great and arduous and confining, that one man could not attend to them with promptness and despatch; and had not the last Legislature given some help, a portion of my salary would have been consumed, any how, in clerk hire. After the Income Tax Act passed, such were its imperfections, (as it was passed in haste, and near the close of the session,) and so many were the constructions put upon it by the various Tax Receivers and tax-payers, that, from the latter part of April till the 1st of August, I was almost wholly engaged in replying to letters, and giving the construction of this office to the various provisions of the Act. But with such time

as I could spare from these duties, and with the assistance allowed me by the Legislature, we have been able to prepare several tables from the census returns of 1850 and 1860 and from the Tax Books, in this office, that I think will not only be very useful at the present time, but will be of use for many years; and especially will they be thus useful, since Georgia having dissolved her connection with the "United States," she is and will be deprived of the usual mode of her people in obtaining statistical information from the census returns of 1860, and back, in relation to their own and other States. The copy from which these returns for 1860 are taken, were sent to Milledgeville by the U. S. Marshal for Georgia, a short time before the State seceded.

The tables that I have prepared from the census returns consists of the following items of information, viz:

Table "H" contains *for each county* the white population for 1850 and 1860; slave population in 1850 and 1860, and the total population for 1850 and 1860. Also, the number of acres of land, from the Tax Books of 1860, the aggregate value of the same, and the average value per acre.

Table "I" contains *for each county* the improved land in 1850 and 1860; the number of 400 pound bags of cotton returned in 1850 and 1860; the number of bushels of corn returned in 1850 and 1860; the number of bushels of wheat returned in 1850 and 1860; and the number of pounds of rice returned in 1850 and 1860.

Table "J" contains *for each county* the number of sheep in 1850 and 1860; the number of pounds of wool gathered in 1850 and 1860; the number of swine in 1850 and 1860; the number of milch cows in 1860; the number of oxen in 1860; the number of other cattle in 1860; and the total number of all cattle in 1850 and 1860.

Table "K" contains *for each county* the number of horses, asses and mules in 1850 and 1860; the value of live stock in 1850 and 1860; the value of slaughtered animals in 1850 and 1860; the number of bushels of oats in 1850 and 1860; and the number of bushels of rye in 1850 and 1860.

Table "L" contains *for each county* the number of bushels of sweet potatoes in 1850 and 1860; the number of bushels of Irish potatoes in 1850 and 1860; the number of bushels of peas and beans in 1850 and 1860; the number of pounds of sugar in 1850 and 1860; and the number of gallons of molasses in 1850 and 1860.

And table "M" contains *for each county* the number of pounds of butter for 1850 and 1860; the value of home-made manufactures in 1850 and 1860; the number of gallons of wine in 1850 and 1860; the number of pounds of beeswax and honey in 1850 and 1861; and the value of orchard productions, and value of market gardens in 1860.

The following table will show an exhibit, or the grand

26 PART I—COMPTROLLER GENERAL'S REPORT.

total of the items, in the above stated tables, throughout the State, together with the increase and decrease of the same from 1850 to 1860.

	1850.	1860.	Increase.	Decrease.
White population,	521,572	596,998	75,426	
Slave population,	381,682	458,540	76,858	
Total population,	906,185	1,055,538	149,353	
Improved land,	6,378,479	7,918,292	1,569,813	
Unimproved land,	16,142,900	18,055,866	1,612,966	
Cash value of farms,	95,753,445	151,683,981	53,930,536	
Value of farming implements and machinery,	5,891,150	6,582,137	687,987	
Number of horses,	151,331	128,744		22,587
Asses and mules,	57,377	100,722	43,343	
Milch cows,	331,223	293,669		40,554
Working oxen,	73,280	73,620	331	
Other cattle,	600,019	619,199		70,820
Total cattle,	1,097,528	986,488		111,040
Sheep,	560,435	500,971		59,464
Swine,	2,168,017	2,601,904		167,613
Value of live stock,	25,728,116	37,161,881	11,433,768	
Wheat, bushels of,	1,088,534	2,506,709	1,418,168	
Rye, bushels of,	53,750	195,373	51,624	
Indian corn, bushels of,	30,680,009	30,213,819	133,720	
Oats, bushels of,	3,820,044	1,215,627		2,604,417
Rice, pounds of,	38,950,091	58,377,613	19,126,922	
Tobacco, pounds of,	423,924	925,000	501,160	
Ginned cotton, bales of 400 lbs. each,	499,091	697,937	198,844	
Wool, pounds of,	990,019	911,910		75,103
Peas and beans, bushels of,	1,142,011	1,738,627	596,612	
Irish potatoes, bushels of,	227,370	281,568	62,189	
Sweet potatoes, bushels of,	6,986,428	6,511,105		475,323
Barley, bushels of,	11,501	15,176	3,675	
Buckwheat, bushels of,	250	1,590	1,340	
Value of orchard products, in dollars,	92,776	175,066	82,290	
Wine, gallons of,	796	26,476	25,680	
Value of produce of market gardens,	76,590	191,271	114,771	
Butter, pounds of,	4,640,559	5,296,603	656,044	
Cheese, pounds of,	16,976	14,843		82,133
Hops, pounds of,	261	185		76
Flax, pounds of,	5,389	3,159		2,228
Flax-seed, bushels of,	622	110		512
Silk cocoons, pounds of,	813	77		736
Maple sugar, pounds of,	50	3,236	3,186	
Cane sugar, pounds of,	1,642,000	932,000		710,000
Molasses, gallons of,	216,150	629,746	413,596	
Beeswax, pounds of,	48,831	64,500	15,756	
Honey, pounds of,	683,680	944,885	261,205	
Value of homemade manufactures,	1,838,968	1,445,682		393,286
Value of animals slaughtered,	6,339,762	11,034,788	4,695,026	
Number acres land returned on tax books in 1860,		33,345,289		
Aggregate value of land on tax books in 1860,		161,764,955		
Average value of land on tax books in 1860,		4 85		

As the Tax Books for 1850 do not show either the number of acres of land returned or their value for that year, of course I cannot furnish the same for that year.

It is proper also to say, that the Census Books of Franklin and Miller counties for 1860 could not be found, consequently the returns for these counties in 1860 are not included in the above.

It will be seen that while the number of acres of improved land in 1860 over 1850 was but 24 per cent., the increased value of farms amounted to 61 per cent. It will be seen that while the increased production of cotton in these ten

years was 39 per cent., the increased production of corn was not quite one-half per cent., not beginning to keep up with the increase of population, which was 16 per cent.

It will also be seen that while the increased production of wheat was 130 per cent., the increase of rice was 49 per cent., and the increase of peas and beans was 52 per cent., yet there was a *decrease* in *all* animal food used for the support of man; there being a decrease of 11 per cent. in cattle, and near 8 per cent. in swine.

It is true there was an increase of 74 per cent. in slaughtered animals, but this only goes to show, first, that a part of these animals were purchased and brought from other States and slaughtered in Georgia, and, secondly, that as our people did not raise as much as formerly, and depended upon others for their meat, it increased in price. It is also true that the *value* of live stock was increased 44 per cent., but, it will be seen again, that this *increased value* was only on account of the *general decrease* of the *number* of live stock, the net decrease being 317,361; and when it is seen that the decrease in horses was 15 per cent., and that the increase in mules was 75 per cent., it will at once be perceived that our people had began to also neglect the raising of horses and mules, and had purchased largely of the latter from Kentucky, Ohio, and other States. A careful analysis of this table can but satisfy every one, that, for the past ten years up to 1860, the people of Georgia were so intent upon making cotton, they seemed to neglect every thing else except wheat and rice, and that corn and meat, and for the necessary stock to carry on their plantations and farms, they were every day becoming more dependent upon those who were "not of us," and who are now our stoutest foes. It is to be hoped that the lesson we are now learning through bitter experience, will forever hereafter teach our people *never to be guilty of such folly again*. But, that, come what may, *we will always hereafter raise our own meat and bread*. So may it be.

Population of the five largest cities in Georgia.

	1850.	1860.	Increase.
Savannah,	16,060	22,292	6,253
Augusta,	11,753	12,843	740
Columbus,	5,942	9,621	3,679
Atlanta,	2,572	9,554	6,892
Macon,	5,720	8,247	2,597

2S PART I—COMPTROLLER GENERAL'S REPORT.

The population of Georgia from 1790 to 1860.

The following was the population of Georgia, at different times, as taken by the United States census takers, viz :

	White pop'lation.	Slave pop'lation.	Total pop'lation.
1790,	53,284	29,264	82,548
1800,	102,697	59,404	162,101
1810,	147,215	105,218	252,433
1820,	200,333	140,654	340,987
1830,	299,292	217,531	516,823
1840,	410,448	280,944	691,392
1850,	524,503	381,682	906,185
1860,	595,097	462,232	1,055,538

COTTON, CORN AND WHEAT STATISTICS FOR 1863.

In 1862, your Excellency directed me to issue instructions to the various Tax Receivers and Collectors of the State to furnish a statement of the number of acres planted in cotton and corn and other grain in the counties in 1862. All of these officers except in five counties, viz: Chatham, Dade, Dawson, Johnson, and Randolph, furnished returns, but several confessed that their returns were rather imperfect, from the fact that they received the order several weeks after they commenced their regular work. This year I desired to follow up this call by asking for the number of bales of cotton, the number of bushels of corn, and the number of bushels of wheat made in 1862, but the Code and the action of the last Legislature had increased the duties of those officers so much, without increasing their pay, I did not feel authorized to *require* this service of them, but merely requested them to furnish me with the information, if they could conveniently obtain it. Over fifty counties failed to comply with this request, and as several of those forwarded appear to be imperfect, and as nothing definite can be derived from them, I have concluded not to give them in this Report.

THE INCOME TAX.

The last Legislature at its extra session in April, passed an Act taxing the profits upon the sale and manufacture of woolen and cotton goods, and leather, the distillation and sale of liquors, provisions, merchandise, &c. The tax was placed upon all profits where the per cent made during the

year was 20 per cent or upwards on the capital or credit employed. As the traders and speculators in these common necessities of life had not only made large profits upon their neighbors at home but also upon the soldiers, and their families at home, the Legislature provided that the tax raised from this source should be distributed to the families of indigent soldiers in December next.

Had there been no "misunderstanding" of the law, no dodging it or no fraudulent returns made by parties subject to its provisions, I am inclined to the opinion that the tax raised under it would have amounted to \$1,500,000 or \$2,000,000. But such has been the misunderstanding of its provisions, or erroneous or fraudulent returns made under it, I doubt much if the tax will net more than \$500,000.

The act taxed all profits of 20 per cent or upwards, made on capital or credit employed in the purchase and sale of articles enumerated, from the 1st of April, 1862, to the 1st of April, 1863. For instance, profits of 20 per cent paid 50 cents on the \$100. Profits over 20 per cent and to 30 per cent \$1.50 on the \$100. Profits of over 30 and to 40 per cent paid a tax of \$2 on the \$100, and so on, up to 100 per cent, which paid \$5 on the \$100—200 per cent paid \$10 on the \$100, and so on, &c.

Plain as the main principle of the act seems to be, I have every reason to believe that either from a misunderstanding of the law, or to avoid a large tax, many persons have failed to make their returns in accordance with the requirements of the Act. Instead of returning only the original capital according to their returns made on the 1st of April 1862, and paying tax on their profits, according to the per cent made on the same; as they would make profits during the year from this original capital, they would re-invest it and make further profits, and then when called upon to make their return for the Income Tax they include all these investments and *re-investments of profits* during the year, as *Capital*—thereby whittling down the tax to a comparatively small sum. That your Excellency and the Legislature may understand more fully how this thing has been done, I will take for illustration two or three Factories in this State. One Factory, for instance, while making its return for the General State tax in 1862, put its capital at \$25,908. The Legislature, in its enactment, supposed it was taxing the profits made upon this amount of capital, according to the per cent made. This Factory returned as its profits made from April 1862 to April 1863, \$70,000; and according to this interpretation of the Act, the tax upon the profits of this Factory would have amounted to \$9,800. But when the owner of this same Factory came to make its return to pay the Income Tax, instead of putting the capital the same as it was given in for, on the General State tax in

1862, the capital is put at \$118,238.38, and the profits \$70,000, showing profits of only 59 per cent, instead of over 270 per cent, and thereby bringing down its tax to \$2100. Another Factory in making its return for the General Tax of 1862, returned its capital at \$462,538 and it made \$450,139.50 profits, or 97 per cent according to its return for the general tax; and its income tax would have been \$22,506.97. But when it came to make its return for the income tax, it put its capital at \$1,500,468, and its profits \$450,139.50 claiming to have made only 29 9-100 per cent profits, and only paying a tax of \$6,751.59. Another Factory, while making its return in like manner for the General Tax in 1862 put its capital at \$44,462 and it made profits of \$88,000 from April 1862 to April 1863. According to these returns on the 1st of April 1862, its profits would have been near 200 per cent and its tax would have been \$8,800. But when it came to make its return for the Income Tax, it put its capital at \$150,000 and its profits at \$88,000, showing only a profit of 60 per cent and bringing its tax down to \$2,640. I might go on and cite other cases, but I think this sufficient. It will be seen that in these three cases, the return of capital in 1863, as having been employed from April 1862 to April 1863 is *more than the original capital* returned on the tax books in 1862 *and the profits all put together!* This is rather remarkable, considering that we had a blockade, nearly all the time, and that even had the Factories *needed and desired* a double or treble supply of machinery, &c., they could not have purchased it. But these strange returns are not confined to Factories alone,—merchants, traders, grocers, &c., return on the General State tax book for 1863 double the amount of capital they returned in 1862, and yet they pay no income tax at all, while others again, whose returns this year are double and treble what they were last year, by some hocus pocus, unknown to me, pay but little income tax.

This is a bad state of things, but it cannot be helped where the Tax Receivers and Collectors, and the good citizens of the counties, where these returns are made, permit such returns to be made, without having an investigation. The Act provides, that where "the Receiver of Tax Returns" or "any citizen of the county in which the alleged fraudulent returns are made" shall suspect the same to be false or fraudulent, and will under oath so declare their suspicions, and will ask the Inferior Court to appoint triers, the Court shall appoint the same, &c.

I have heard of but two cases, in which efforts have been made to have these income tax returns investigated. In one case the Assessors found the return fraudulent. In the other case, the Grand Jury of the county took the matter

in hand, and during the investigation, some of the parties themselves became satisfied that they had misunderstood the law and had not made proper returns and they voluntarily and before any action of the Jury increased their taxes over \$2,700.

That your Excellency and the Legislature, may see the returns from the various counties and draw your own deductions, I herewith submit the returns of the various counties for the income tax, giving the amount of capital claimed to have been employed, the amount of profits made, and the amount of tax levied.

In the above statement, I deem proper to state that there are four default cases, viz: one in Clinch, one in Decatur, one in Fulton and one in Richmond, and under the construc-

tion placed upon the third and fourth sections of the Act by your Excellency, each defaulter has been charged \$50,000 for being in default. Whether the parties have enough visible property to pay the default taxes, or whether it can or cannot be collected I am not prepared to say.

AMENDMENTS TO THE REVENUE LAWS.

It having been, by law, made *the duty* of the *Comptroller General* to "*suggest, in his Annual Report, such improvements in the Revenue Laws as his experience and observation may approve,*" I would respectfully submit the following for the consideration of your Excellency and the Legislature. First, then, I will allude to the act providing specially a

Tax on Cotton.

From my "experience and observation" in this office for several years, having suspected that, in consequence of that provision in the Act of 1852, exempting from taxation "the annual crops and provisions of this State," a large amount of tax was withheld from the State," by cotton speculators and other purchasers of cotton failing to return said property for taxation, notwithstanding such cotton was unquestionably "merchandise," in my last Annual Report I recommended to the Legislature to *specially declare* cotton an article of "merchandise," and to require all such property not belonging to the original owner or producer to be returned for taxation, and to pay a tax as other property. The Legislature heeded my recommendation, and passed the Act suggested. Although the Act passed has had a very happy effect, as it will bring into the Treasury from \$85,000 to \$100,000 that otherwise would not have been collected had the bill not been passed; nevertheless Tax Receivers and warehouse-men represent to this office that it is very difficult to carry it out faithfully, in consequence of that part of the Act which exempts from taxation the cotton or other produce owned by the original producers on the first of April in each and every year. The warehouse-men urge that it is very difficult, if not in some instances impossible, for them to state, under oath or otherwise, the owners of all or much of the cotton in their warehouses. They represent that when cotton is stored in their warehouses, they give the original owner or producer receipts for the same, and these receipts are transferrable. In many instances the original producer does not sell his cotton when he brings it to market, but stores it in the warehouses, and takes a receipt—but that when he sells, he does not notify them, but merely transfers the receipts to the purchaser. This purchaser perhaps again transfers it to another buyer,

these receipts sometimes passes through various hands—and the warehouse-man does not know whether the cotton has ever been sold until the receipt is again returned to him for the cotton. Your Excellency will at once see the necessity for some amendment of the present Act, to remedy this difficulty. It should be provided that all cotton found in warehouses on the first of April shall be subject to taxation, and that none be released, unless the original owner or producer, by a certain time stated, files his affidavit at the warehouse, that his cotton there has not been sold—or, that part of the Act of last year be repealed, which exempts from taxation any class of cotton, that may be in the State on the first of April.

As the time for making a return of property for taxation is as late as the first of April, I think it questionable whether there ought to be any distinction made in the taxation of cotton at this time. In former years, most planters went in debt for property, to be paid for when they sold their cotton. Generally they sold their cotton before the first of April, but whether they sold it or not, they paid tax on their cotton or other produce in the shape of a tax upon property that they bought the latter part of the year, or in the early part of the year before the 1st of April—hence the provision in the Act of 1852 exempting from taxation the “annual crops and provisions of the citizens of this State.” But, in these days, when the credit system has been pretty well abolished, and people pay cash for what they buy, and when planters and others hold cotton as the best investment they can make, or the best property they can hold, and when they now generally hold their other surplus produce until after the first of April, to get higher prices, and as our *ad valorem* tax system requires all persons to pay tax on their property according to its market value, I think it very questionable whether it is fair to tax one class of holders of cotton and to exempt another class, or to tax one class of produce holders, who hold said produce for sale, and exempt another class, who also hold the same for sale. And, with these views, I would respectfully submit the matter for the reflection and action of your Excellency and the Legislature.

The want of uniformity and the inequality of the tax upon Slaves.

For several years past, I have reported upon this subject, and offered tables in my Reports showing the returns to this office as to the value of slaves in the different counties in the State, and I have also alluded to the great difference in the values placed upon slaves in making their returns in the same county. Having waited for years for the Legislature to originate and enact some plan to produce a more uniform and equal valuation of slaves throughout the State,

and nothing having been done, last year I suggested a plan that I thought freest from objection to any other I could think of. Consequently, a bill was drawn up in accordance with my suggestion, and offered in the House of Representatives, but I regret to say that it did not pass.

After further mature reflection upon this subject, I cannot think of any plan, without departing from the *ad valorem* system, better calculated to produce uniformity and equalization of taxation as to slaves, than the one proposed last year. I therefore again "suggest" it. It is in substance as follows:

Let the Justices of the Inferior Courts in all the counties in the State meet on the first Monday in February in each and every year, and at that time place a valuation upon the slaves to be given in for taxation—estimating each sound slave by age or ages, and sexes—adding so much per cent. where said slave or slaves are mechanics. Then let these valuations be immediately, or by the 1st of March, sent to the Governor or Comptroller General, and when the *average value* of each age, or ages, throughout the State, is ascertained, let that be stated in the Comptroller General's Annual Circular to the Receiver of Tax Returns, and let this *average value* for each slave of a certain age be the *assessed value* at which said slave or slaves shall be returned throughout the State. Each tax-payer being required only to swear to the age or ages of his *sound* slave or slaves that he returns—and if any be unsound, deformed, &c., he be required to swear to the unsoundness or deformity, &c., of said slaves, and be required also to swear to their value, and to return the same upon this valuation.

By such a mode as this, we will still retain or will not interfere with our *ad valorem* system of taxation, and I think all will pay a more equal tax, on their slaves at least, than under our present system. It may be said that it would save time, trouble, &c., by the Legislature passing an Act regulating the tax throughout the State, by placing a *specific tax* upon each slave, according to age or ages. This, however, would be departing from the *ad valorem* system, and would be either favoring or disfavoring slave property, so far as taxation is concerned. But even if it did not do this—apart from such a mode having the effect to produce sectional issues—apart from the difficulty of 169 members, or a majority of the Legislature readily agreeing to the proper valuation to be put upon slaves for taxation, when we have to raise more or less money every year—the plan I propose is better than any other that I can think of, because the valuation would be made at a short period before the time returns are to be made, and as *all* would have to pay a like *ad valorem* tax on their property, there would be no ground for complaint.

But, how will this plan operate? Let us see. Suppose that out of all the counties in the State *only three* made their valuations and sent their returns to the Governor and Comptroller before the 1st of March—and the first county valued a sound negro fellow between 18 and 25 at \$2,000, the second valued him at \$1,800, and the third valued him at \$1,600—total valuation \$5,400—making an average of \$1,800 to each county. Then, according to these returns, the owners of all sound negro men between 18 and 25, in all parts of the State, would be required to return the same at \$1,800. Suppose, again, that the first county valued a negro girl at 12 years of age at \$1,400, the second valued the same aged negro girl at \$1,200, and the third should value her at \$1,000—total valuation \$3,600, or average value \$1,200. Then \$1,200 would be the value at which all sound 12 years old negro girls in the State should be returned for—and so on, throughout all the ages. Where persons have been compelled to abandon their plantations and homes, some distinction might be made as to the valuation of their property. But as, no doubt, a bill embracing these views will again be drawn up and presented to the Legislature for its consideration, I will for the present say nothing more upon the subject, except to refer your Excellency and the Legislature to table "B" in this Report, that you may see the inequality this year in the taxation of slaves in the several counties throughout the State. It will be seen that Echols county pays about 66 cents more upon each slave than Lumpkin—that Dade pays about 65 cents more than Dawson, and 57 cents more than Wilkinson—indeed, it will be seen that hardly any three counties pay the same tax upon their slaves.

Want of authority for deciding and punishing Receivers of Tax Returns for receiving property for taxation under its known market value.

In several instances, during my service in this office, I have been satisfied that either through incompetency or design, Receivers of Tax Returns have permitted many persons, and in some instances whole counties, to give in their property far below the generally supposed market value. In two or three instances, this neglect of duty has been so glaring, I have been strongly tempted to make an *example* of these Receivers of Tax Returns, for the good of the public—but, upon referring to the law, I could find no authority for the Comptroller to reject a book or punish a Receiver for any such cause—the law making the Receiver and tax-payers, and not the Comptroller, the persons to say what is the proper value to be put upon property. I would respectfully call the attention of the Legislature to this

matter, and recommend that some plan be adopted by which these neglectful and faithless officers shall be reached.

Tax on Defaulters.

As it is sometimes to the interest of tax-payers to become defaulters, especially where they have had legacies left them, or where they have suddenly made a good deal of money or other property, all tax laws have had their default penalties. To prevent defaults heretofore, the old law made the first default pay a double tax, the second succeeding default a treble tax, and the third succeeding default a four-fold tax. The Code, however, which is now the law, only provides for the first default, by assessing a double tax. No additional penalties are prescribed for other succeeding defaults. I would therefore recommend an amendment to the tax laws in this particular. And, as in these days of wild speculation, many persons have in a short time made five, ten and fifteen and some twenty times more than their previous property, the temptation becomes strong with them to be in default, rather than disclose their property under oath, and pay their proper tax. I would therefore respectfully suggest, that the first default be double, the second succeeding default be a four-fold tax, the third eight times the original tax, and so on, continuing to double the last tax each time until a return is made. This I think will have a good effect in checking willful defaulters.

Tax on Express Companies.

The present tax upon Express Companies I think entirely too low. From the large profits they make, (so far as I am informed, there appears to be comparatively little capital invested) and, as they are allowed to charge what they please (and they please to charge enormously for every thing they do), I think it nothing but right and proper that they should pay quite a good tax, for doing business in this State.

The Act of 1858 and the Code taxes Express Companies only one per cent. on their net profits on business done within the State—the returns to be made and tax paid to the State Treasurer on the 1st of April in each and every year. In accordance with the Act of 1858, the Cashier of the Southern Express Company paid into the State Treasury, on the 1st of April last, \$686 25 for the year previous to the date of payment—showing that they made on business done in the State of Georgia alone, the round sum of *sixty-eight thousand six hundred and twenty-four dollars* NET PROFITS. How much it has made in other States cannot be told by me—but if their profits in Georgia be a fair criterion by which one is to judge, it is fair to presume they made a half million dollars last year, while I doubt if their capital stock be over \$300,000. Their stock now sells for

about \$1,500 per share for \$100 paid in. From the increased and heavy charges this year (as one or two warrants in my Report will show) for a little service, I shall not be surprised if their net profits in the Confederacy this year will be double that of last. While, then, they are making such large per cents or profits, I hardly think 5 or 10 per cent. upon their net profits would be too high a tax. Nevertheless, were these Express Companies restricted by law in their charges, it is quite likely that the public, or all classes, would be much benefitted, while a less tax than 5 or 10 per cent. might very properly be collected of them.

Tax on Foreign and Home Insurance Companies.

Previous to the year 1855, there was no tax upon Foreign Insurance Companies. But, discovering that there were but few Home Insurance Companies in the State, and that large amounts of premiums for insurance were yearly taken out of the State, I recommended the levying of a tax upon Foreign Insurance Companies. Consequently, the Legislature passed an Act placing a tax of one per cent. upon the premiums received by Foreign Insurance Companies on their insurances in this State. Several thousands of dollars have been collected from this source since that time. Three thousand one hundred and eighty nine-dollars and thirty-six cents has been collected from these Companies during the past year, showing that the people of Georgia paid to Insurance Companies of other States, during the past year, over three hundred thousand dollars in premiums on insurance. In consequence of the great demand for insurance and the large sums paid by the people of Georgia to Insurance Companies of other States, many Home Insurance Companies have been chartered and gone into operation in this State. Capital that has heretofore paid a tax has been put in the same, while their profits, undivided are either kept on deposit or are otherwise invested—and so far as I can discover, these Home Insurance Companies pay no tax. I would therefore respectfully suggest that the tax on Foreign Insurance Companies be raised to two per cent. on their premiums received, and that the Home Insurance Companies be required to pay one per cent. on their premiums received in this State, or that their capital stock paid in be taxed as bank stock is now taxed in this State.

The Consolidation of the two offices of Receiver of Tax Returns and Tax Collector.

Every day's experience and observation but confirms me in the views expressed in my last Annual Report, as to the policy of consolidating and permitting *one man* to hold the *two offices* of Receiver of Tax Returns and Tax Collector, in the several counties in this State. Similar errors to those

alluded to last year have been found in this year's Tax Books, whether intentional or not I cannot say. But, with these two offices in the hands of one man, the door is so widely open for fraud, and the difficulty of detecting the same, if committed, being so great, with the limited help allowed in this office, to examine the books from the time they are received till the time necessary to levy the tax, I would again most respectfully urge upon the Legislature the propriety of *repealing* the Act of 1861 consolidating the two offices of Receiver of Tax Returns and Tax Collector. The following are the views expressed in my last Annual Report:

"The last Legislature having passed almost unanimously an Act to consolidate the two offices of Receiver of Tax Returns and Tax Collector, and allowing but one, or the Collector's commissions to the officer for performing the duties of both offices, and as there seems to be a large amount saved thereby, in the collection of the General State Tax, it is not only with much diffidence, but only after much thought and reflection as to my duty to the State, as one of its trusted public officers, that I have determined to offer in this Report, my views in opposition to the propriety of the passage of this Act, and of its future continuance in force.

Were I to consult my own desire to "agree with all and disagree with none," or were I further to consult prudence so much as to "shun attempting to convince others, *well pleased with their own, that their own will not do,*" I would still be silent at this time in relation to this Act—for the Legislature to whom this Report will be transmitted by your Excellency, will be composed of the same members who passed it with so little opposition. Nay, more. While I will not impute, in the slightest degree, to that body less generosity and less magnanimity or patriotism than that of any other similar body of patriotic representatives, yet readily acquiescing in the truthfulness of the aphorism, that "man convinced against his will, is of the same opinion still," I have not the same hope of convincing the members of that body of the correctness of my views in relation to their own Act, that I would others not thus committed, and I would therefore, as a matter of pleasure, prefer being silent at this time. But having been also continued in this office by the unanimous vote of that same body, with the belief on their part that I would continue to discharge its duties to the best of my ability, and without "fear, favor or affection," towards any one, or any body, and the LAW having made it MY DUTY NOW TO SPEAK in relation to this and all other portions of the revenue laws, that I think ought to be amended or repealed, I would therefore most respectfully say to your Excellency that the "Act to consolidate the offices of Receiver of Tax Returns and of Tax Collectors in this State,

and to require the duties thereof to be discharged by one officer, to be styled Tax Receiver and Collector," ought not, in my humble judgment, to have passed in its present shape, and that I think it ought to be immediately repealed or essentially amended.

Although there appears a large amount saved to the State by this Act, in not allowing to the Tax Receiver and Collectors the commissions that might have been allowed at this office to the Receiver of Tax Returns, under our *increased* tax, *had not the commissions been scaled*, yet I doubt much whether in the whole operations of this law, in the collection of the State and county taxes, much if anything will be saved in the aggregate to the people, even this year; and if permitted to continue as it is for a few years, the office will become one of speculation, and be strenuously sought after by the designing and faithless, and the State and counties will, in all probability, lose largely even though the amount apparently saved were much larger than it now appears to be.

While the offices of Receiver of Tax Returns and Tax Collector were *separate* and distinct, and *held by two separate persons*, there was much to promote an honest, energetic and faithful performance of the duties of each office by those holding them. The Receivers and Collectors were rewarded in more ways than by an honest and faithful performance of their respective duties. The Receiver of Tax Returns was not only rewarded in commissions for being accommodating to the people and allowing as many as possible to *give in or return their property* to him, as he got no commissions on those he returned in default, although it was his *duty* to return all in default—it was not only his *duty* and *interest* to have his returns of property as *large as possible*, and his *abstract or grand total* of the various items as *correct* and as *large as possible*—but, on the other hand, it was made the duty of the Collector, and he was required to take a separate and distinct oath to search diligently for all property overlooked or not returned by the Receiver, and to return the same to this office in a small digest. And further to encourage said Collector to diligence in said work, he was allowed double commissions by the State on the property so returned—and he also got commissions from the county on the same. If the Collector made a large return of this property, it was not only an evidence that he was a good and faithful officer, but it was also further evidence that the Receiver had not discharged his duty properly, and consequently was not worthy to be retained longer in office. Therefore, while, since I have been in office, I have found and corrected many errors in the digests sent here by the Receivers, the much larger portion being against the State, and in favor of the Collector, yet as I could conceive of no

advantage to said officers by such a return, I have not suspected or imputed fraud to them in any case. The Collector, too, was not only bound to respond to the charges made by the Receiver, and this Office, when the digests were examined, unless he furnished a certificate from the Inferior Court pointing out distinctly and clearly the errors complained of, but as before remarked, if he presented or returned a larger amount of property overlooked by the Receiver, he not only got double commissions on this property, but his character as an officer was also advanced thereby. But how stands the matter now? Have not these "checks and balances" in the main been brushed away by the Act above alluded to? I think they are. But let us examine only a little.

The "Tax Receiver and Collector" *not only makes out his own books or makes his own charges, but he collects the money from the tax payer himself*; and the only and greatest protection that the State has against incompetency, against errors in addition, or against fraud, is one Comptroller General, (with no Clerks allowed) who has to "examine and correct all returns of taxable property" in 132 Tax Digests, averaging about 50 (or say 40) pages each, with 26 taxable columns 38 lines deep on each page. All this, too, is to be done in about three or four weeks after receiving said digests, to enable him to levy the tax in time for the Collectors to go to work. And while doing this work, said Comptroller is required daily, as may be presented to him, to examine, register and date and sign all warrants that may be drawn upon the Treasury, and keep up a large correspondence with Tax Receivers and Collectors, tax payers, &c., &c. It is true the present law does not require the Comptroller General to foot up or re-add each item in each column in all of these books, but he is to "examine and correct" the returns of the Receivers of Tax Returns—which has heretofore been usually done by comparing the various item columns in the abstract and comparing the aggregate and tax columns, and where there appeared a doubt as to the correctness of the book or books, to have the same re-added, and then again the same process of examination is gone through. And here I would most respectfully submit to your Excellency (to give these various columns and abstracts a proper review and examination, and especially where errors are detected) if time enough is allowed for two, or three, or four persons to properly perform this service, much less one person with various other duties to perform at the same time? Having found this duty very onerous every year since I have been in office, even with the assistance I have been able to obtain from others, it was for some time a mystery to me how my predecessors got through with this work and other duties without being

pretty well worn down, and especially without help. But the matter was soon explained by one of my predecessors, who stated that he did not attempt to look over these books for errors, for it was impossible to do so in time to issue orders to collect the tax, but that, as the Receivers were sworn officers, as well as himself, and could have no corrupt motive in charging incorrectly either for or against the State, it was his habit to take from the Receiver's book his abstract or Total Return, and charge the Collector with the same. If this be the correct interpretation of the law, then I have done a great deal of extra and laborious work for the State on these books since I have been in office, and I am happy to say, resulting very beneficially to the State, saving it many thousands of dollars, though from the shortness of time allowed me, and with the multiplicity of engagements on hand, I have not heretofore been able to give the Digests that thorough examination that I desired. But I will return to the present state of things. With, then, the whole of the receiving of the returns of the taxable property, &c., of the State and the collection of money for the same, in the hands of *one man* in every county, and he being authorized and required to *make out his own books and make his own charges against himself*, surely, that the State and the several counties may get their rights in all cases, these books *ought to be re-added* and the charges for each item *ought to be made by some other* besides the *person who collects the money*. But will your Excellency or the Legislature look over the matter and estimate the time it ought to take one man (with no other duties to perform) to go over and re-add each item and column in these Tax Books, of say even forty pages each, with 26 columns, 38 lines on each page, (including the qualities of land, number of acres of each, total number of acres, number of slaves, and number of children returned for participation in the Educational Fund,) and then adjust and reconcile the various abstracts. Can one man, with nothing else to do, perform this service in twelve months? Can he do it in twenty-four months? I am very sure one man cannot perform the service properly in twelve months, and I doubt if he could do it much under the twenty-four months. And yet, *if this be not done*, what is to *prevent* a Collector from putting a *short abstract* to a *large return*. What is to prevent him from adding *some columns correctly* and giving the addition of others *incorrectly* and then *justifying* any short abstract he chooses to make by an *addition of the columns of items*. Nay more. What is to prevent a bold and daring rascal from *keeping out of the regular book* which is sent to this office (and upon which the tax is levied) a few wealthy men, and making the abstract tally with the items on the book sent here, and the one filed in the Clerk's office of the Inferior Court, and pocketing

the proceeds? But suppose that, by *accident* or otherwise, some good citizen should examine the county book and should detect these things and suspect fraud, and should call upon the Collector for an explanation, or he should notify the Comptroller General and he should call upon the Collector for explanation, before a final settlement, and said officer should reply, "It is true, I accidentally, in copying from my blotter, omitted these names on my regular Digest, but I have them entered on my small digest, which the law requires me to keep, for those overlooked or not entered on the regular Digest, and I *intend* to account for these to the State and county when I make my final settlement," what then could the Comptroller or good citizen say? What could the State do, when under a safer and better system, and to more securely obtain her dues, in taxes, she had required a Collector to return a small digest to this office when he made his final settlement, of all property overlooked or omitted by the Receiver, and upon which the said Collector had collected the tax?

But again. Grant that all of our Collectors for the present year and for the future should be above suspicion and of the most conscientious class, what is to prevent them from doing as the best of accountants now and then do viz: put down wrong figures in addition. It is said that "figures do not lie," and this is true where they are put down *correctly*, but nothing is farther from the truth than a figure out of its proper place. Ought, then, a Tax Receiver and Collector to be suspected of fraud, or punished for fraud in all cases, where he commits an error against the State in his own favor, without further evidence of an intention of fraud? I think not. If so, we would soon have a few Tax Receivers and Collectors in the Penitentiary, who I am satisfied intended no fraud; and by way of illustration, I will present among others, only three cases that came before me in examining the books of this year. In one book containing a large return, by reference to the returns of last year I found the abstract much shorter than it ought to be, after allowing for the ordinary decrease in returns, in the value of property since April, 1861. By way of proving the Grand Total, I took the item columns and run them up and found them several hundred thousand dollars larger than the Grand Total. I immediately wrote to the Collector, informing him that his abstract was entirely wrong and largely against the State, and that he must go over his book again, &c. This book was re-added by the Tax Receiver and Collector, and the last return was \$1,000,945 in property more than the first return, making a difference in the State Tax alone of \$1,851 74. Upon enquiry into this case, it was satisfactorily shown to me that the Tax Receiver and Collector being sick at or about the time the

book was to be sent to this office, he got a friend, a gentleman deemed fully competent, to foot up the items and make out his abstract for his books, and it was this friend, and not the Receiver and Collector who committed the errors in calculation. There was another case in which there was an error in the tax column of about \$1,306,861, in property returned, making a difference against the State alone of \$2,417 69. The Tax Receiver and Collector brought this book to this office himself and was so sure that it was correct that he could not readily understand the error, but after my demonstrating it in various ways, finally admitted it, within a small fraction—assuring me, that before he came here with his book, to be sure it was correct, he got two or three friends to aid him in making up his abstract, and that all agreed that it was correct. On looking over another book of another county, and applying my usual first test, I discovered an error of over \$100,000 in property against the State, in the tax column. To have his book correct, this Tax Receiver and Collector satisfied me beyond question, that before his book came to this office, he had submitted it to the examination and correction of a very respectable gentleman and a school teacher of high reputation among his fellow-citizens, and that *he* pronounced it “all correct,” &c. But upon going over and comparing and footing up the book again, there was found an error against the State, in the first return, of \$160,120, in the addition of return of property, making a tax of \$206-21 against the State alone, and in favor of the Tax Receiver and Collector. I might cite other errors found, where there may or may not have been any intention to make a wrong or imperfect return, but as I am clearly satisfied that neither of the above named parties *intended* a fraud upon the State and their counties, that your Excellency and the Legislature may see that fraud ought not to be imputed in *all* cases where errors are made by the Tax Receiver and Collector, in his own favor against the State, I have thought it well enough at this time to present these cases. But suppose these returns had not been criticised closely, and the Comptroller General had merely “examined” the “total” return of the Tax Receiver and Collector, and had charged him accordingly—and suppose further that the county tax in each of these counties had only been 100 per cent. on the State tax (in many counties it is 200 and 300 and 350 per cent. upon the State tax) and here we would find, that the first Receiver and Collector, after *having paid all* that was *required* of him for the *State and county* tax and after taking out *all his commissions*, would have had a surplus of \$3,703 48; the second \$4,835 38; and the county of the third already having levied a tax of 200 per cent. upon the State tax, this one would

have had a surplus of \$892 63, after paying all the State and county taxes "required" of him and paying all of his commissions. If they are as honest as I take them to be, the State and county may not have suffered this loss, when they discovered the condition of things at the close of their collections; but under the lameness and defects of the Act of 1861 consolidating the two offices, and not providing for some competent and disinterested party re-adding these books, if disposed, they could have retained these sums, and neither this office or the Inferior Courts would have been any the wiser. And, here, I will digress a little by saying, that while I have heretofore used all diligence and care that I could, in examining and correcting these digests, amidst the various other daily duties coming it upon me while doing so during the short time allowed, and while I have found many errors both for and against the State, and have corrected them, something rather remarkable has occurred, and it is this: While Collectors have *complained* from year to year to this office, that the Receiver or this Office had *overcharged them*, and while in many instances the Inferior Courts, upon the complaints of the Collectors, have certified to this office that the Receiver in his abstract had overcharged the Collector *hundreds of dollars in the tax*, I do not now recollect the *first instance* in which a Collector has *complained* to the Inferior Court or this office that the Receiver *undercharged* him in his abstract. Some have reported the property of tax payers who gave in to the Receiver, and which the Receiver entered on his blotter, but omitted to put in his books, &c., but I have no recollection of a case where a Collector has *complained* that the Receiver in his addition had made a *mistake in his (the Collector's) favor and against the State* for any of these large sums alluded to. With this statement of a fact, I will leave your Excellency and the Legislature to draw your own inferences. On my own part, I would here remark, that, considering the shortness of time I have heretofore had to examine and correct these books from year to year, and having in the midst of these examinations, been compelled to drop the books a dozen or more times during the day, to examine, enter and sign warrants, give receipts for money, sign and charge Head Rights and copy grants and testimonials, write letters, answer questions, &c., I *may* have been very successful in thus guarding the interests of the State, in this particular, but I have not heretofore flattered myself that I have been as successful as this fact would indicate.

I might amplify further and expose still more the liability to gross errors being uncorrected and the chances for fraud, unless the Act of 1861 is essentially amended or immediately repealed, but I think I have exhibited enough to

satisfy any one open to conviction that the Act, as it stands, *will not do*.

What, then, is the best and most economical mode of remedying this evil? With what reflection I have been able to give the subject, I would respectfully recommend the repealing of the Act of 1861, and a return to the old system of *keeping the two offices* of Receiver of Tax Returns and of Tax Collector *separate*, and of requiring two *separate persons* to hold them. The Legislature might authorize the election of a Receiver of Tax Returns in each county, (or provide for Assessors, if that ~~body~~ should think it best,) whose duty should be to return all taxable property, foot up the various items of the same and make a return to this office under oath, and then allow the Comptroller General sufficient clerical force to examine generally the additions and abstracts of these receiving officers, before levying the taxes. In the meantime, as the various Tax Receivers and Collectors have been elected for two years, under the Act of 1861 consolidating the two offices, and the Legislature may not feel authorized to interfere with the tenure and terms of their election, it might provide that these books shall be examined and re-added in each county, by some competent person, before being sent to this office, and then allow sufficient clerical force in this office to examine closely the various columns, abstracts, &c., in the books of the different counties; and where, upon this examination, there appears any error or errors, to re-add every item and column of any book in which errors are detected. The greatest difficulty in having *all* the books indiscriminately footed up, or *re-added* in toto in this office, would be the difficulty in *procuring* a sufficient number of *competent* persons to do the work, after the books are received, in time to levy the tax. Perhaps a sufficient number of persons could be *found* about Milledgeville who could do the work well, but those are usually engaged in some regular and profitable business, and their services could not be obtained for a short time, or a few weeks, even though good daily pay was offered.—Therefore, I think it better that the digests be first examined and re-added by some competent person (besides the Tax Receiver and Collector) in the several counties before being sent to this office. After having obviated the difficulty, then, as to the present officers, I would respectfully recommend the adoption of the first proposition, as the *safest* and most ECONOMICAL mode of carrying out our General Tax Laws efficiently and effectively. And as our General State Tax is now 150 per cent. over that of 1860, and the commissions received in 1860, being fair and liberal, for the time necessarily consumed in the discharge of the duties of these two offices, and as no more labor is imposed upon these officers on account of the increased tax, (though there

is some additional responsibility upon the Collector in the larger amount of money to collect, which is made up in his increased commissions from the county taxes)—as long as we raise our present tax or a lesser amount over \$400,000, I would also suggest that the commissions of the Receiver of Tax Returns and Tax Collector be scaled so that they will receive about the same pay said officers received in 1860, when the State tax was \$400,000. And, while doing this, let a slight discrimination be made in favor of said officers in those counties whose digests do not net over \$1,000. In the adoption of the first proposition, with this additional suggestion, the pay of both the Receiver of Tax Returns and Tax Collector will not exceed the pay already provided under the Act of 1861 more than \$10,000 or \$12,000, but if it exceeded it \$50,000, I think it far preferable and more economical than our *present* system.

My observation and experience in this office may be worth but little, but I repeat, that unless the Act of 1861 is essentially amended or repealed, I fear it will not be long before the speculative, the cunning and *faithless* will be striving hard to get the office of 'Tax Receiver and Collector' in the different counties in the State. If they cannot impose upon the people by their address or otherwise, or if they cannot buy themselves into office with the usual means of electioneering employed by the least meritorious, they will promise a portion or all of the *commissions* of the office to this or that benevolent or praiseworthy object, or agree to give the same to some favorite soldier's widow, or soldier's orphans, and they may even fulfil these promises, too, but IN THE END, THE STATE AND COUNTIES ARE VERY LIKELY TO SUFFER."

As the currency has expanded much since my last Report, and labor and every thing else has gone up 100 per cent. or more, I doubt much the propriety of confining the commissions of these offices to what they were in 1860, indeed I do not think it ought now be done. But should the two offices be separated, in view of the large tax now necessary to be collected, and the increased commissions. such a schedule might be adopted as would give both the Receiver of Tax Returns and Tax Collector a fair and remunerating commission.

Since writing the above, I find that the Grand Jury, in one of our large counties, having investigated this subject, have recommended their members to the Legislature to have the two offices separated in their county—and I doubt not many others will be forced, from seeing the ill effects of the system, to do the same, if the Legislature does not act at this session.

Very Respectfully,

PETERSON THWEATT,
Comptroller General.
